SKILLS

Programming Languages - C++

PROJECTS

Enhancing the security of encryption algorithm through a linear feedback shift register

The Playfair Cipher is a manual symmetric encryption technique and was the first digraph substitution cipher. To encrypt a message, one would remove all spaces and then break the message into digraphs. The encryption technique proposed a smart method of generating random numbers by linear feedback shift register for mapping of cipher text generated by play fair algorithm.

CERTIFICATES

AWS Fundamentals: Going Cloud-Native by Amazon

The Fundamentals of Digital Marketing by Google

ACHIEVEMENTS

- 1.) Certificate of Merit provided by college for securing 78.30% in University Exam 2nd year.
- 2.) Participation in Social Welfare Activities.
- 3.) Participated and won the Mehendi Competition.

ACADEMIC DETAILS

B.Tech/B.E. (Information Technology) , Krishna Engineering College
AKTU, 2021

XII, Dwakar Model School
CBSE, 2017

X, Siddharth International Public School
CBSE, 2015

HOBBIES

Playing Chess, Reading Newspaper, Playing Badminton
